SUMMARY

Full-stack developer specializing in MERN stack development, backend engineering, AI/LLM applications, and scalable system architecture. Experienced in REST APIs, real-time systems, semantic search, and AI-powered applications, with hands-on experience in Docker, AWS, and cloud deployment.

EXPERIENCE

Infosys Springboard

Nov. 2025 – Jan. 2026

AI Intern

- Worked on **AI Query Tube**, focusing on semantic search and intelligent query retrieval.
- Implemented NLP-based similarity matching and embedding-driven search pipelines using Python.
- Built and evaluated query-understanding workflows to improve search relevance and accuracy.

AICTE – Shell India – Edunet Foundation

Jul. 2025 – Aug. 2025

Data Analysis Intern

- Completed an internship focused on Artificial Intelligence and Data Analysis.
- Analyzed sustainability datasets and contributed to real-world problem-solving projects.

PROJECTS

LedgerLite | *MERN Stack, JWT, Cloudinary, Render*

Live | GitHub

- Built a secure finance management system for tracking income, expenses, and categories.
- Designed REST APIs using Node.js, Express.js, and MongoDB with JWT-based authentication.
- Developed React dashboards with real-time analytics; deployed on Render with Cloudinary and automated email reports.

Fixify | *MERN Stack, Socket.IO, Tailwind CSS, Zod*

Live | GitHub

- Developed a service-booking platform with structured workflows for users and service providers.
- Implemented REST APIs, JWT authentication, and real-time updates using Socket.IO.
- Built a responsive React frontend with Tailwind CSS and Zod validation; deployed on Render.

Multi-Agent AI System | *MERN, LangGraph, LangChain, RAG, Qdrant, Redis*

Ongoing

- Developing a multi-agent AI system using the MERN stack to coordinate specialized agents for complex tasks.
- Implementing LangGraph and LangChain workflows with AI tool calling, streaming AI responses, and RAG.
- Integrating Qdrant Vector Database, Redis caching, Docker containerization, and AWS deployment practices.

EDUCATION

Buddha Institute of Technology

2022 – 2026

B.Tech in Information Technology — CGPA: 8.0/10

Carmel School

2021

Class 12th – ICSE — Score: 7.8/10

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js, Redux Toolkit, REST APIs, JWT Authentication

Backend & Architecture: Production-Ready Microservices Architecture, Scalable Folder Structure, File Upload & Document Processing

AI & LLM: Multi-Agent AI Systems, LangGraph, LangChain, RAG (Retrieval-Augmented Generation), AI Tool Calling, Streaming AI Responses

Data & DevOps: Qdrant Vector Database, Redis Caching, Docker Containerization, AWS Deployment

Engineering: Best Coding Practices, Complete Frontend + Backend Development

TECHNICAL ACHIEVEMENTS

- Completed **Deloitte Australia – Technology Job Simulation (Forage)** and **IBM SkillsBuild – AI Certification**.
- Solved **150+ Data Structures & Algorithms** problems on LeetCode.
- Secured **3rd position** at TechYuva technical fest.
